SRS – ZAMEEN.COM

1-BACKGROUND:

1.1 Project:

Zameen.com is real estate platform in Pakistan and it provides users with problems and comprehensive solution for buying, selling and renting properties. Zameen.com revolutionized the real estate industry by introducing a unique, technology-driven marketplace for property transactions and also for selling and buying purpose. It also includes real rental houses and properties and Pakistan leading pioneer platform for real estate projects

1.2 Pre history

Before Zameen.com several application like OLX (Online exchange), lamudi.com and PPS (Pakistan property service) and prop.pk were present but these companies or apps don't required much features. Zameen.com was one of the first to provide a comprehensive, user-friendly, and specialized platform dedicated entirely to real estate in Pakistan. It is rapidly growing company in Pakistan and go to platform for listing and become dominant from earlier competitors by offering more advanced features and professional services.

Before Zameen.com and its application the real estate sector of Pakistan follows traditional dealings; it based on physical visits to for properties transactions, Buyer and seller face problems and have security, trust issues and fraudulent fear leading to mislead and inefficiency, Real estate data was scattered with no any data of trending market ideas, and also they have limited accessibility. These scenarios created a need for platform for real estate projects which provides reliable and accessible solution for these problems

1.3 Project goals:

Zameen.com share the vision to make

- Simple property transactions
- Accessible for everyone and have value added features and services
- Centralized real estate agencies
- Build trust and transparency

1.4 Project aim:

It discuss mission to make ease for people in buying selling and renting their properties and describe them with that tools and insights to make real decisions for real estate projects. This application also follows new market trends and demands for streamlined, platform for real estate projects in Pakistan. It creates opportunities for online properties solutions and it will make more digital and transparent traditional real estate projects.

1.5 Target audience:

The target audience for this projects are property buyer and seller, real estate developers, investors and renters who are looking for houses, plots and commercial areas.

1.6 Business model:

The application will also provide its users with the facility of searching for different properties. And this app will be a business model and share some important goals

- Generate income by offering featured and highlighted property listings, along with strategic placement of real estate-related advertisements throughout the platform.
- Create tiered membership options that real estate professionals and agencies can subscribe to, providing them with enhanced tools and visibility.
- Form strategic alliances with property developers to showcase and market their new construction projects and developments.

2- INTRODUCTION:

2.1 Purpose:

Zameen.com is a versatile real estate website that not only allows users to buy, sell, and rent properties but also provides various tools to make the process smoother and more efficient.

Zameen.com connects buyers and sellers of properties, and tenants and landlords. The extensive listings and projects on offer provide something for everyone when it comes to property. The No 1 Marketplace Application of Pakistan between the property buyers, sellers, agents. It helps seamlessly connect property listing, searching, and connecting sales, and sales together within the real estate ecosystem through an easy-to-use platform.

2.2 Scope:

The scope of this application covers:

- Do property listing make extensive database for all types of properties either commercial, residential or for industrial.
- It has advance location based search filters for price, size and other amenities.
- It have interactive features like virtual tours, map searches and integration and property details
- It follows communication tools like in app messages or chat box between seller, agent and buyer.
- This will be available on both **Android** and **iOS platforms**, with a responsive web Its major users are individual property buyers and sellers, real estate agents, and developers.

2.3 Project principle:

- We're making online space where people looking for their next home or property they can easily connect with sellers and real estate professionals who have exactly
- We want to take the headache out of buying, selling, and renting properties by making every step simpler and faster for everyone involved – no more endless paperwork or confusing processes.
- By putting reliable market data and property insights at your fingertips, we help you make confident decisions about what could be the biggest investment of your life.
- We believe in making real estate transactions more open and honest, which is why we carefully verify property listings and agent credentials, so you can browse with peace of mind.

2.4 Audience:

The intended audience for this who needs this srs is

- Developers
- Stakeholders
- Project managers
- Testers

3- USE CASES:

1. Signup\ registration module
2. Login module
3. Edit profile
4. Property listing
5. Smart recommendations module
6. Off market properties
7. Edit\ remove property listing
8. Searching for properties
9. Advance filters
10. Save properties
11. Property details
12. View nearby amenities
13. Contact buyer\seller
14. In app messaging
15. View market trends
16. Property comparison
17. Use mortgage calculator
18. Rent affordability calculator
19. Receive notification
20. Purchase premium listing
21. Advance subscription module

22. Approve listing
23. Manage users

4- USE CASE DESCRIPTION:

4.1 Signup\ registration Module

ID	UC - 01
Title	Signup\ Registration
Actor	New users
Description	New user is allowed to create an account
Pre-condition	App must be downloaded, and this web based application must running in the browser
Post-condition	User has registered or sign up successfully
